Venkatesh Raghavan

Professor of Geoinformatics, Osaka City University, Japan

- TUE 16 JUL
- 13:30-14:30
- International Conference Hall, Plaza Heisei

BIOGRAPHY

Prof. Venkatesh Raghavan is an alumnus of the Department of Geology, Pune University and obtained his Doctor of Science in Geological Remote Sensing from Osaka City University Japan in 1994. He is presently based in Japan as Professor of Geoinformatics at the Graduate School of Engineering, Osaka City University. His research interest includes geospatial Web Services, sensor network, Geo-Crowd Sourcing and remote sensing for change detection. Prof. Venkatesh Raghavan was one of the founders of the Free and Open Source Software for Geoinformatics (FOSS4G) global initiative in 2004. He has been involved in OSGeo Foundation (www.osgeo.org) since its inception in 2006. He was on the first OSGeo Board and was re-elected to again in 2015 and served as the President of the Foundation during 2016-2017. He is on the Advisory Board of the Geo4All initiative (www.geo4all.org). He plays active role in promoting FOSS4G in Asia.

Prof. Raghavan is currently Co-Editor-in-Chief of Spatial Information Research and is on the Editorial Board of International Journal of Geoinformatics and Applied Geomatics journals. He is the founder of ZOO WPS Platform Project which offers a comprehensive framework for deploying Geospatial-Software as a Service (Geo-SaaS). He is a team leader and member in several Geoinformatics projects and has vast experience in conducting national and international training programs and development of learning materials for RS/GIS using FOSS4G. He is actively involved in promoting Free and Open Source Software Solutions for Geoinformatics (FOSS4G) worldwide including organizing global, regional and national FOSS4G events.

He was awarded the Mining & Material Processing Institute of Japan Young Scientist Award in 1995. He has taken up visiting professor assignments at prestigious universities such as the Asian Institute of Technology, Bangkok and China University of Mining and Technology, Beijing. Prof. Venkatesh Raghavan was recipient of the 2012 Sol Katz Award for his contribution to the Open Geospatial Community and remains to be only Asian to receive this honour till date.

Beyond the Jargon: FOSS4G, OSGeo, Geo4All and ME4E

Geo-enabled Information and Communication Technology (Geo-ICT) is the mainstay of several international and national initiatives. Geo-ICT research contributes to the development of various location-aware services using Global Positioning Systems (GPS), the Internet of Things (IoT), Sensor Networks (weather, environment, water/air pollution etc), and Remote Sensing (satellites, UAV's). Applied Geoinformatics, using tools such as Geographic Information System (GIS) and Remote Sensing, supports an increasingly wide range of disciplines that include the arts, humanities, social/natural sciences and engineering.

Open Source Software, Open Hardware, Open Data and Open Standards constitute the four vital pillars supporting the implementation and deployment of interoperable and scalable Geo-ICT solutions for a variety of applications areas. A robust and customizable platform to facilitate Geospatial-Software as a Service (Geo-SaaS) forms the backbone of several citizen centric initiatives. Prudent and effective use of geospatial technologies requires the fostering of a highly skilled workforce for developing, maintaining Geo-ICT solutions for societal needs. The FOSS4G (Free and Open Source Solutions for Geoinformatics) initiative that began in 2004, has gained widespread acceptance the world over the 15 years. Since 2006, the Open Source Geospatial Foundation (OSGeo) has been spearheading the collaborative development of open source geospatial software and promote its widespread use. Active OSGeo Chapters have also been established worldwide to cater to specific local needs. As a part of the educational outreach and skill development, the OSGeo Foundation along with partner organizations such as the International Cartographic Association and the International Society for Photogrammetry and Remote Sensing has also established the Geo4All international network of universities and research institutions offering high-level training and sharing of knowledge and experiences to build a strong and vibrant geospatial workforce.

Further, in recent years, a wealth of geospatial Open Data has become available through international and national agencies but also through participatory data production initiatives such as the Open Street Map. Due to the proliferation of GPS-enabled devices, Crowd Sourcing and Volunteered Geographic Information has also facilitated easy gathering and value addition of open geospatial data. The past decade has also seen the maturity of international standards for geospatial data exchanges and interoperability through the initiatives of the Open Geospatial Consortium (OGC) and ISO.

This talk aims at demystifying the acronyms FOSS4G, OSGeo and Geo4all through temporal focus on the past, present and future. The speaker plans to narrate some anecdotes and personal experiences as experiential traveller the FOSS4G world. A gist of some new initiatives being undertaken and priorities for coming years will be outlined. Lastly, opportunities for joint industry-academia-government initiatives for collaborative innovation in mapping and cartography will be discussed. Some examples of leveraging the Free & Open geospatial ecosystem for deploying a participatory mapping framework to bring about positive social change will also be presented.

Steve Coast

Vice president, TomTom

- WED 17 JUL
- 13:30-14:30
- International Conference Hall, Plaza Heisei

BIOGRAPHY

Coast interned at Wolfram Research before studying computing science at University College London (UCL). In July 2004, he founded the OpenStreetMap project (OSM).

Coast set up Z.X.V. Ltd. with Nick Black, Tom Carden and Ben Gimpert as a technology consultancy in 2005. In 2008 this became CloudMade after investment by Nikolaj Nyholm and Sunstone Capital (company's website claims it was established in 2007). He resigned from CloudMade in October 2010, although he remained a shareholder.[citation needed]

On 23 November 2010, Coast announced that he had accepted a position as Principal Architect at Microsoft's Bing Mobile.

On 3 September 2013, Coast wrote on his blog that he had started to work for TeleNav, taking care of OSM development for the company's Scout navigator.

In March 2014, Coast became an advisor to Auth0, an identity-as-a-service provider.

In November 2015, Coast published "The Book of OSM". The book contains 15 interviews conducted by Coast with various users who had participated in the project since its beginning.

In January 2016, he stepped down from full-time work at TeleNav and started his work as a board advisor in Navmii. In March 2016 he started working as Chief Evangelist for what3words. In May 2016 he became an advisor in MapJam. In fall 2017, he joined DigitalGlobe. In spring 2019 he joined TomTom as a vice president in the Maps department.

The Past, Present, and Future of OpenStreetMap

Steve will be presenting on the past, present and future of OpenStreetMap – discussing how to edit, licensing, community and more. Steve will also discuss his book, "The Book of OSM", containing interviews with 15 early adopters of OSM to capture the early growth and feeling of the project.

Ayako Kagawa

**Geographic Information Officer, Chief Cartographic Unit, Geospatial Information Section,
Office of Information and Communications Technology, United Nations**

- THU 18 JUL
- 13:30-14:30
- International Conference Hall, Plaza Heisei

BIOGRAPHY

The United Nations Geospatial Information Section is an office responsible in providing strategic and tactical geospatial information management services to the United Nations Secretariat. The Section provides wide range of services including maps and guidance for UN official publications and customised geospatial services for the Secretariat; serves as the Secretariat function of the United Nations Committee of Experts on Global Geospatial Information Management (UN-GGIM); provides technical support on international boundary issues including administrative boundaries; and provides programme management support to United Nations field missions who have geospatial support components. The Section provides technology driven solutions to enable Secretariat colleagues who are entrusted by the international community to resolve challenging global mandates and missions.

Ayako Kagawa is a Chartered Geographer, serving the United Nations since 2003 in various capacity including thematic mapping for the United Nations Office on Drugs and Crime (UNODC), topographic mapping for the peacekeepers in the United Nations Disengagement Observation Force (UNDOF) and currently with the United Nations Geospatial Information Section. She provides policy guidance and operational support in the areas of cartography, geospatial information management, international boundaries and geographical names. Prior to the United Nations, Ayako has worked with Japan Map Center as a Planning Officer in Japan and as a research assistant and a lecturer in ITC (Faculty of Geo-Information Science and Earth Observation, University of Twente) in The Netherlands.

The Role of Cartographers in a Sustainable Development World

The 2030 Agenda for Sustainable Development or also known as the Sustainable Development Goals (SDGs) is the new global paradigm and blueprint to achieve a better and more sustainable future for all. To collectively achieve the SDGs, the global community agreed on 17 Goals as a baseline framework to measure and monitor its growth. How to measure and monitor development progress by countries has been a long-standing debate since the era of Millennium Development Goals (MDGs) in the 2000s but with the establishment of Inter-Agency and Expert Group on SDG Indicators (IAEG-SDGs), the SDGs have a clearer framework on how to monitor progress and the global community are grappling on how to effectively collect, analyse, visualise and report their successes.

Within the United Nations, there is an attempt in providing principles and tools on how best to report the SDGs at country and local level as its success lies in the ownership and accountability at all levels. The Secretary-General of the United Nations has been anxious on how the use of technologies can accelerate the SDGs and to facilitate the alignments with the values enshrined in the United Nations Charter, the Universal Declaration of Human Rights, and the norms and standards of International Laws.

In this paradigm, what should be the role of cartographers and geospatial information management experts to ensure how maps and geospatial information can be effectively used by the global community at all levels to communicate their challenges and successes from planning to implementing, monitoring, analysing, visualising and reporting on sustainable development? This presentation argues the importance of listening the challenges, asking questions to the policy makers, sharing best practices and building a consensus on the issues surrounding the SDGs before demonstrating the diverse cartographic skills available to communicate the intended message better. Hence, the importance of context has never changed and provides the cartographic and geospatial information management community an opportunity to demonstrate the potential and a vision of maps for sustainable for all through better communication.

*The views expressed are those of the author(s) and do not necessarily reflect those of the United Nations.

Eric Gundersen

Mapbox CEO

- FRI 19 JUL
- 13:30-14:30
- International Conference Hall, Plaza Heisei

BIOGRAPHY

As CEO of Mapbox, Eric Gundersen oversees product, business, and marketing.

Eric started Mapbox to create tools that make location data powerful and available to everyone. Previously, Eric co-founded Development Seed, a consultancy that developed open source tools for international development agencies and nonprofits to map the world.

He holds a master's degree in International Development, and a dual bachelor's degree in Economics and International Relations from American University.

Building a living map of the world updated from billions of sensors

Mapbox maps learn from every application they're embedded in. Over 640 million people use Mapbox every month. Every day these devices generate 14 billion anonymous sensor readings that are used to deliver precise traffic data and instantly ship over 100,000 daily changes to maps on any connected device. Using AI and machine learning, this information delivers precise, predictive drive times and finds the best routes for drivers.

Eric Gundersen, CEO and Founder of Mapbox, will speak about the future of mapping, from its roots with OpenStreetMap to sharing new plans on launching in Japan with SoftBank this summer. Gundersen will also do a live demo of this new AR Vision, turning cameras into co-pilots using AI-powered semantic segmentation, object detection, and classification to identify the variables that define a driver's journey. This live data with distributed sensors can detect construction, recognize street signs and speed limits, and identify potential hazards to enable augmented reality navigation and automated driving.

ICC2019 Joint Activities

Annual Conference of the Japan Cartographers Association 2019

16th Jul. 10:00 - 18:00

Presentations (oral, poster sessions), Workshop on "MIURA-ORI", Japanese Cartographic Exhibition

17th Jul. 10:00 - 13:30

Special Session on "Technical Terms for Digital Mapping", Presidential Address, Japanese Cartographic Exhibition
ICC2019 participants are allowed to join the meeting (All presentations are held in Japanese)

Special Exhibition "Japanese Maps: Past, present and future"

Supported by the Future Map Consortium

18th and 19th Jul. 10:00 - 17:00

A variety of Japanese maps and tools for mapping, including a navigation system with the quasi-zenith satellite, an application for browsing old maps with smartphone, and aerial views of Tokyo.

Everyone can freely visit and enjoy the exhibition.

International Cartographic Exhibition

The official opening of the International Cartographic Exhibition will take place in Telecom Center Building on Tuesday the 16th July at 9:00.

During the cartographic exhibition countries from all over the world will exhibit most recent cartographic products in digital or paper format. Maps and cartographic products are submitted in 7 different categories:

- Maps on panels
- Charts on panels
- Atlases
- Digital Products
- Digital Services
- Educational Cartographic Products
- Other Cartographic Products

Barbara Petchenik Children's World Map Drawing Competition

The competition was created by the International Cartographic Association in 1993 as a memorial for Barbara Petchenik, a past Vice president of the ICA and cartographer who had a lifelong interest in maps for children. The aim of the contest is to promote the creative representation of the world in graphic form by children.

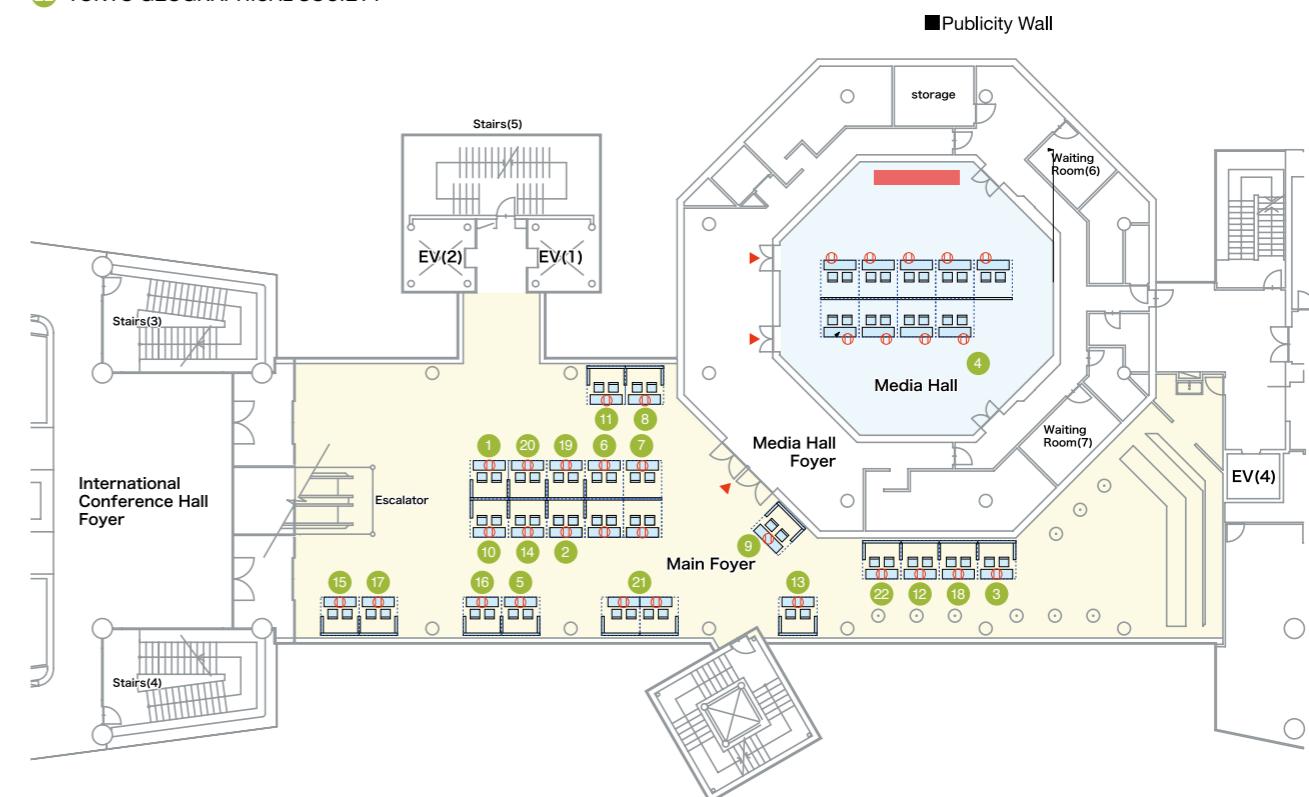

188 drawings by national winners from 33 countries are exhibited in Telecom Center Building from 16th to 19th July.

International Technical-Commercial Exhibition

Local Organizing Committee of ICC2019 holds the Technical Exhibition sponsored by the following exhibitors in Tokyo International Exchange Center (Plaza Heisei) from 16th to 19th July.

8:30-10:20 T01-1 Art, History & Design Saturn (Miraikan)

Chair: Sharon Hayashi (York University)

T01-1-1 Procedural Knowledge of Graphic Design for Analysing Graphic Elements in Historical ... Urban Maps
Chenyang Xie**T01-1-2** Who were cartographers of manuscript topographic maps in the Enlightenment?
Beata Medyńska-Gulij**T01-1-3** 3D art cartography in Belarus: The historical development and achievements in the modern period
Anna German**T01-1-4** City maps: Dreams, Art, Cartography, Planning
Cosimo Palagiano**8:30-10:20 T02-1 Atlases - Theory and Principles Innovation Hall (Miraikan)**

Chair: Francis Harvey (Leibniz-Institute for Regional Geography)

T02-1-1 National atlases - an atlas type reconsidered
Eric H Losang**T02-1-2** Atlases and Systems Theory within Systematic Cartography
Vit Vozenilek**T02-1-3** 3D Carto-Graphics – Principles, Methods and Examples for Interactive Atlases
René Sieber, Remo Eichenberger, Lorenz Hurni**8:30-10:20 T12-1 Location Based Services I Uranus (Miraikan)**

Chair: Haosheng Huang (University of Zurich)

T12-1-1 Incorporating directional signs into indoor navigation systems
Wangshu Wang, Haosheng Huang, Hao Lyu, Georg Gartner**T12-1-2** The development of a cognitive indoor route planning algorithm: which aspects to include?
Nina Vanhaeren, Kristien Ooms, Philippe De Maeyer**T12-1-3** Linking perception to decision point complexity for adaptive indoor wayfinding support
Laure De Cock, Kristien Ooms, Nico Van De Weghe, Philippe De Maeyer**T12-1-4** Positioning Locality Based on Cognitive Directions and Context in Indoor Landmark Reference System
Yankun Wang, Weixi Wang, Xiaoming Li, Shengjun Tang, You Li**8:30-10:20 T25-1 Ubiquitous Mapping Mars (Miraikan)**

Chair: Masatoshi Arikawa (Akita University)

T25-1-1 Intergenerational differences in the use of maps: results from an online survey
Yoshiki Wakabayashi**T25-1-2** Visual-Inertial Odometer-Based Global High Precision Indoor Human Navigation in a University Library
Akinori Takahashi, Shinpei Ito, Masatoshi Arikawa, Ruochen Si**T25-1-3** Virtual Circular Geofences for Points and Regions of Interests with Spatial Context
Masatoshi Arikawa, Hoshito Tokita, Ruochen Si, Ren Sato, Ryodai Tayama, Akinori Takahashi**9:20-10:20 Asia-1 Opening Remarks and First Asia GIS Keynote Conference Room 4+5 (Plaza Heisei)**

Chair: Yohta Kumaki (Senshu University)

Asia-1-1 Brief opening remarks
Anond Snidvongs (GISTDA)**Asia-1-2** 30 Years Development of Geographic Information Systems
Deren Li (Wuhan University)**9:20-10:20 T36-1 The transition to contemporary mappings Conference Room 1 (Plaza Heisei)**

Chair: Kam Wing Fung (The University of Hong Kong)

T36-1-1 The gradual reinforcement of Japanese mapping in pre-colonial Taiwan and Korea
Shigeru Kobayashi**T36-1-2** Development and Publication of Volcanic Base Map Data
Gen Nagano, Hironobu Tsuchihashi, Katsuhiro Okamoto, Yoshinori Numata**T36-1-3** Mapping time-distance

10:50-12:10 T01-2 Journey as Method Conference Room 4+5 (Plaza Heisei)

Chair: Jianya GONG (Wuhan University)

Asia-2-1 Assessing airport ground access by public transit in Chinese city-regions
Xingjian Liu**Asia-2-2** Mapping Geo-spatial Dimensions of Water in Jammu and Kashmir to Pursue Wider Peace
Seema Mehra, Premendra Kumar Parihar**Asia-2-3** Classifying and Mapping Street-Blocks Based on Multi-Source Spatio-Temporal Data
Jiansi Yang, Shuai Liu, Mingsheng Liao, Yandong Wang**Asia-2-4** Delineation of Chinese county-scale urban function patterns with the real-time Tencent user density
Yao Yao, Jianfeng Zhou, Qingfeng Guan, Yaqian Zhai**10:50-12:10 T01-2 Journey as Method Saturn (Miraikan)**

Chair: Cristina M. Iosifescu Enescu (ETH Zurich, Switzerland)

T01-2-1 "A journey as a flow": A personal spatio-temporal projection of the world.
Aleksandra Stanczak, Antoni Moore**T01-2-2** Drawing North America by Hand
Anton Thomas**T01-2-3** Maps of Literary Trails in Thessaloniki
Alexandra Koussoulakou, Yiannis Mitzias, Konstantinos Ntovas, Symeon Simeonidis, Michail Bakoyannis**T01-2-4** Borderknots – cartographying experiences of crossing borders
Katrin Gattinger**10:50-12:10 T02-2 Atlases – Processes and Tools Innovation Hall (Miraikan)**

Chair: Eric Losang (Leibniz-Institute for Regional Geography)

T02-2-1 The automation of processes of atlas mapping
Sergey Anatolyevich Krylov, Gleb Igorevich Zagrebin, Anton Viktorovich Dvornikov, Dmitriy Sergeyevich Loginov, Ivan Evgenyevich Fokin**T02-2-2** Graphical modeling with the choreomatic method. A case study on Saudi Arabia.
Mohsen Dhib**T02-2-3** Extending Exploration and Navigation Capabilities of the Atlas of Switzerland
Michael Schmuki, René Sieber, Lorenz Hurni**T02-2-4** Maps under the global condition: a new tool to study the evolution of cartographic language
Pierre Cherrier, Sebastian Lentz, Jana Moser, Laura Pflug**10:50-12:10 T04-1 Cartography and Children 1 Mars (Miraikan)**

Chair: CARLA CRISTINA SENA (UNESP)

T04-1-1 Teaching basic map concepts in three countries: Azerbaijan, Hungary and United Arab Emirates
José Jesús Reyes Nunez, Naeema Al Hosani, Nargiz Safaraliyeva**T04-1-2** Spatial Thinking in Children's Education: The relationship between Geography and Cartography
Paula Strina Juliasz, Sonia Vanzella Castellar**T04-1-3** Initiative aiming to introduce children to maps in Kenya
Catherine Mugure Njore, Bartholomew Kuria Thiong'O, Charles Mwangi Kimari**T04-1-4** School Atlas with Augmented Reality
Nikola Petrov Yonov**10:50-12:10 T05-1 Cartography in Early Warning and Crisis Management 1 Venus (Miraikan)**

Chair: Jiping Liu (Chinese Academy of Surveying and Mapping)

T05-1-1 Using GIS and cartography as part of the whole-of-society approach to determine coercion into marine wildlife poaching and piracy.
Peter Schmitz, Duarte Gonçalves**T05-1-2** Role of geospatial information for disaster risk management as exemplified in recent large earthquakes in Japan
Hiroshi Une, Takayuki Nakano**T05-1-3** Evaluating earthquake-related ground failure mapping by combined traditional and modern methods
Takayuki Nakano, Hiroshi Une, Kazuki Yoshida, Satoshi Fujiwara, Tomokazu Kobayashi

Chair: Kaori Ito (Tokyo University of Science)

T43-4-1 Giving life to the map can save more lives. Wildfire scenario with interoperable simulations.
Walter David, Francesco Giannino, Duncan Heathfield, Antony Hubervic, Attila Aknai, Athanasios Sfetsos, Silvia Elena Piovan

T43-4-2 GIS-based hillshade representation combined with relative relief as pseudo shade to enhance micro-topography
Keiko Suzuki, Go Ishikawa

T43-4-3 Towards a new face for Planetary Maps: Design and Web-based Implementation of Planetary Basemaps
Andrea Nass, Nicolas Manaud, Stephan Van Gasselt, Trent Hare

T43-4-4 Estimation of three dimensional structure of forest and development of roots of trees using LiDAR data
Mamoru Koarai, Akane Rarikiyo, Wataru Watanabe

8:30-18:00 Poster Session P4 Jupiter (Miraikan)

P4-01 Curve Generalization Algorithm Based on Area of Bends using Head/tail Breaks
Hangyu Wang, Haowen Yan

P4-02 Quality assessment of topographic data automatic map generalization from scale 1:10 000 to 1:50 000
Luo Fu Jun, Zhao You Song, Ma Xu, Wu Xua

P4-03 Deriving Multiple Representation Database: A Model Generalisation Approach
Jagadish Boodala, Onkar Dikshit, Nagarajan Balasubramanian

P4-04 Incremental Updating Information Extraction and Topology Conflict Detection Method for Updating Road Network
Jianchen Zhang, Heying Li

P4-05 Proposition of a Schematization Plugin for QGIS
Luciene Stamato Delazari, Isadora Barioni

P4-06 Dot Symbol Auto filling Method for Land use Areas in Cartgraphic Representation
Yong Yin, Chengcheng Zhana

P4-07 Spatial Analysis to Identify Factors Affecting Residential Land Prices in Disaster Areas
Keiko Inagaki, Satoru Sadohara

P4-08 From walkability to bikeability: A GIS based analysis of integrating bike sharing service in Tokyo TOD system
Tianqi Xia, Xiaoya Song, Xuan Song, Min Lu, Shuzhe Huang, Ryosuke Shibasaki, Kyoung-Sook Kim

P4-09 Design of cooperative update mechanism of national geographic conditions monitoring and basic surveying and mapping
Luo Fu Jun, Zhao You Song

P4-10 LevelFilesSet: An efficient Data Structure for Scalable Web Tiled Map Management Systems
Menelaos Kotsolaris, William Liu, Emmanuel Stefanakis, Yun Zhang

P4-11 Rapid Mapping for German Federal Authorities
Karsten Schmidt, Marian Graumann, Joachim Bobric

P4-12 Research on Event-based Geospatial Data Updating
Zhao Zhou

P4-13 The evolution of spatial structure of China railway network in the past century
Yalan Bai

P4-14 Map Production Supporting Activities of Digitalization and AI
Markus Jobst, Georg Gartner

P4-15 The definition of scale series for atlas maps depending on the density of mapped objects
Gleb Igorevich Zagrebin, Sergey Anatolyevich Krylov

P4-16 Research and implementation of big data visualization based on WebGIS
Lu Wen Juan, Aiguo Liu, Chengcheng Zhang

P4-17 Visual analysis of ICC themes and topics from 2009 to 2019
Li Jing, Liu Hai Yan, Kang Lei

P4-18 Table cartogram generation as an optimization problem
Mao Li, Ryo inoue

P4-19 Mapping urban greenery to create the optimal cooling effect model against solar radiation under the conditions of a smart city
Vladimír Sedlák, Katarína Ondáčillová, Michal Gallay, Jaroslav Hofierka, Ján Kaňuk, Ján Šašák, Jozef Šupinský

P4-20 Social climate of cities as a factor of economic growth (on the example of the city of Kerch)
Alexander Borisovich Zaitsev, Lazareva I.V., Melnikova I.V.

P4-21 Mapping the hot and cold spots of spatial change in Tokyo following the bubble economy period
Ryo Koizumi, Yoshiki Wakabayashi

P4-22 Mapping Gentrification in Little Tokyo, Los Angeles: Using Geographic Information System (GIS) Analytical Tools
Saki Nakashima

Cartography and Geographic Information Science

Cartography and Geographic Information Science (CaGIS) is the official publication of the Cartography and Geographic Information Society. The Society supports research, education, and practices that improve the understanding, creation, analysis, and use of maps and geographic information.

The CaGIS journal implements the objectives of the Society by publishing authoritative peer-reviewed articles that report on innovative research in cartography and geographic information science.

International Journal of Cartography

International Journal of Cartography (IJC) is the official flagship journal of the International Cartographic Association (ICA) which is a much needed research outlet concentrating on the map as a form of communication about the world, and aims to promote research in the fields of cartography and GI Science. The journal encompasses a wide range of topics including: spatial modelling, visualization, analysis and planning; theoretical GI Science including geospatial ontologies and semantics; maritime, environmental and urban GIS, remote sensing and photogrammetry; cognitive-based GIS and cartography; modelling of navigation knowledge and landscape perception in urban spaces and built environments; historical maps; art and cartography; topography.

The Cartographic Journal

The Cartographic Journal (first published in 1964) is an established peer reviewed journal of record and comment containing authoritative articles and international papers on all aspects of cartography, the science and technology of presenting, communicating and analysing spatial relationships by means of maps and other geographical representations of the Earth's surface. This includes coverage of related technologies where appropriate, for example, remote sensing, geographical information systems (GIS), the internet and global positioning systems. The Journal also publishes articles on social, political and historical aspects of cartography.
